DETAILED ACTION***Response To Amendment***

- (1.) The preliminary amendment filed on August 3, 2004 has been entered.

Drawings

(2.) The drawings filed on July 24, 2003 are objected to as failing to comply with 37 CFR 1.84(p)(5) because Figures 5-7 apparently do not include the primed reference characters (e.g. 86') described on pages 14 and 15 of the specification. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled Replacement Sheet in the page header (as per 37 CFR 1.84c) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- (3.) The abstract is objected to as unduly long. Correction is required. See MPEP section 608.01(b).

- (4.) Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means", "said", and "comprising" should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

- (5.) The specification is objected to for the following reasons: (A) Pages 14 and 15 describe primed reference characters (e.g. 86') that do not appear to be in the drawings. (B) The specification does not indicate that the patent application cited on page 12 is now U.S. Patent No. 6,561,496. Correction is required.

Election Of Species

- (6.) This application contains claims directed to the following patentably distinct species of the claimed invention: (A) Figures 1, 2; (B) Figures 3, 4, and (C) Figures 5-7.

Applicant is required under 35 USC 121 to elect a single distinct disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 25 is apparently generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP section 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.

Conclusion

(7.) Action on the merits of the claims is held in abeyance pending applicant's response.
